FOR IMMEDIATE RELEASE

BEACH ADVISORY

The Department of Planning and Natural Resources (DPNR) announces that the Beach Water Quality Monitoring Program, which evaluates weekly water quality at popular swimming beaches throughout the Territory by sampling for Enterococci Bacteria and Turbidity, which is a measure of water clarity, advises the public of the following:

DPNR performed water quality analysis at 34 designated beaches throughout the Territory during the week of February 17-21, 2020. **The following beaches meet water quality standards and are safe for swimming or fishing:**

St. Croix		
Stony Ground	Pelican Cove	Chenay Bay
Dorsch Beach	Princess	New Fort Beach
Frederiksted Public Beach	Protestant Cay	Grapetree
Rainbow	Buccaneer	
Cane Bay	Shoy's	

St. Thomas		
Lindberg Bay	Water Bay	Secret Harbor
Brewer's Bay	Lindquist	Bolongo
Hull Bay	Sapphire	Frenchman's Bay
Magen's Bay	Vessup Bay	
Coki Point	Bluebeard's	

St. John
Cruz Bay
Oppenheimer
Johnson Bay
Great Cruz Bay
Frank Bay

The following beaches **do not meet water quality standards because they exceed the established Enterococci Bacteria threshold and therefore are not considered to be safe for swimming or fishing:**

St. Croix
Cramer's Park

St. John
Great Cruz Bay
Frank Bay

Please Note: Samples were not collected at the following beaches:

- *Halfpenny on St. Croix*
- *Johnson Bay on St. John*

Therefore, the water quality of these beaches is unknown.

All persons should also be aware that storm water runoff may also contain contaminants or pollutants harmful to human health and therefore all persons should avoid areas of storm water runoff (i.e. guts, puddles, and drainage basins) or if any area appears discolored or has foul odors. DPNR will continue to monitor the impacted areas and waters.

For additional information regarding water quality call the Division of Environmental Protection at 773-1082 in St. Croix or 774-3320 in St. Thomas.
