Ever wondered if a brownfield grant was right for you and what information is necessary to develop a strong proposal? If so, please join us for a two-part webinar to gain a better understanding of how to put together a competitive grant application package.

Part 1 will cover some of the activities outlined in the EPA's, "Getting Started Early" document and make sure participants have a good understanding of whether a brownfield grant is a good fit for them. The webinar will also help participants assess where they are in the brownfield process, what information will be needed for a brownfield grant application, and what steps could be taken now to prepare when applying for a brownfield grant this fall:

- Do you have sites and priorities?
- What partnerships are needed to address these sites?
- Have you begun gathering this information?

Answering these basic questions will allow participants to be better informed and prepared when determining whether or not to apply for a brownfield grant.

The Part 2 webinar will focus on the "How To" of developing the basic brownfield program elements and incorporating them into a brownfield grant application:

- What core brownfield program elements should be considered in a grant application and are they robust enough in your community?
- What steps can be taken to develop these elements prior to applying and how do you incorporate that information into your brownfield grant application?

Who should attend? States, Local Governments, Coalitions, and Nonprofits who are thinking about applying for a Brownfield Cooperative Agreement. We encourage participants to invite members of their Brownfields team to join the webinar.

Speakers include:

- * Debi Morey, Kansas State University (KSU) TAB Partner
- * Sean Vroom, New Jersey Institute of Technology (NJIT)
- * Ignacio Dayrit, Center for Creative Land Recycling (CCLR)
- * Beth Grigsby, KSU TAB Partner
