In accordance with the VI Beach Program weekly water quality samples are analyzed for Enterococci Bacterial Concentrations. If the sample is found to have more than 70 colonies per 100ml, the beach is considered to be unsafe for swimming.

***Key:** * - This beach is not monitored during this season TNTC – Too Numerous To Count
 J - The reported value is an estimate NS – Not Sampled This Week (Conflict with the lab or Issue at the site)
 NV – Not Validated
