FOR IMMEDIATE RELEASE

BEACH ADVISORY

The Department of Planning and Natural Resources (DPNR) announces that the Beach Water Quality Monitoring Program, which evaluates weekly water quality at popular swimming beaches throughout the Territory by sampling for Enterococci, Bacteria and Turbidity, which is a measure of water clarity, advises the public of the following:

DPNR performed water quality analysis at 33 designated beaches throughout the Territory during the week of June 14, – June 18, 2021. The following beaches meet water quality standards and are considered safe for swimming and fishing:

St. Croix		
Stony Ground	Pelican Cove	Buccaneer
Dorsch	Cane Bay	Shoy's Beach
Halfpenny Beach	Princess (Condo Row)	Sprat Hall
Cramer's Park	New Fort (Ft. Louise Augusta)	
Chenay Bay	Protestant Cay	

St. Thomas		
Water Bay	Sapphire Beach	Lindquist Beach
Bolongo Bay	Vessup Bay	Coki Point
Frenchman's Bay	Secret Harbor	Lindbergh Bay
Magen's Bay	Bluebeard's Beach	
Brewer's Bay	Hull Bay	

St. John
Cruz Bay
Oppenheimer
Great Cruz Bay
Frank Bay
Johnson Bay

The following beaches do not meet water quality standards because they exceed the established Enterococci Bacteria threshold and therefore are not considered safe for swimming or fishing:

- *Rainbow Beach and Frederiksted Public Beach on St. Croix.*

Please note: Samples were not collected at the following beaches:

- *Gentle Winds and Grapetree Bay on St. Croix*
- *Honeymoon Beach on water Island*

Therefore, the water quality at these beaches is unknown.

All persons should be aware that storm water runoff may also contain contaminants or pollutants harmful to human health, and therefore, should avoid areas of storm water runoff (i.e. guts, puddles, and drainage basins) or any area that appears discolored or has foul odors. DPNR will continue to monitor impacted areas and waters.

For additional information regarding water quality call the Division of Environmental Protection at 773-1082 in St. Croix or 774-3320 in St. Thomas.
