FOR IMMEDIATE RELEASE

BEACH ADVISORY

The Department of Planning and Natural Resources (DPNR) announces that the Beach Water Quality Monitoring Program, which evaluates weekly water quality at popular swimming beaches throughout the Territory by sampling for Enterococci, Bacteria and Turbidity, which is a measure of water clarity, advises the public of the following:

DPNR performed water quality analysis at 18 designated beaches throughout the Territory during the week of June 13 - June 17, 2022. The following beaches meet water quality standards and are considered safe for swimming and fishing:

St. Thomas		
Lindbergh Bay	Vessup Bay	Coki Point
Brewers Bay	Hull Bay	Secret Harbor
Bolongo Bay	Lindqvist Beach	
Magens Bay	Bluebeard's Beach	
Sapphire Beach	Frenchman's Bay	

St. John
Cruz Bay
Great Cruz Bay
Frank Bay
Oppenheimer Beach

Water Island
Honeymoon Beach

The following beach does not meet water quality standards because it exceeds the established Enterococci Bacteria threshold and therefore is not considered safe for swimming or fishing:

- *Johnson Bay on St. John*

Please note: Samples were not collected on St. Croix as well as on the following beach:

- *Water Bay on St. Thomas*

Therefore, the water quality at these beaches is unknown.

For additional information regarding water quality call the Division of Environmental Protection at 773-1082 in St. Croix or 774-3320 in St. Thomas.
