FOR IMMEDIATE RELEASE

BEACH ADVISORY

The Department of Planning and Natural Resources (DPNR) announces that the Beach Water Quality Monitoring Program, which evaluates weekly water quality at popular swimming beaches throughout the Territory by sampling for Enterococci, Bacteria and Turbidity, which is a measure of water clarity, advises the public of the following:

DPNR performed water quality analysis at 17 designated beaches throughout the Territory during the week of July 11 – July 15, 2022. The following beaches meet water quality standards and are considered safe for swimming and fishing:

| St. Thomas | | |
|-------------------|-------------------|---------------|
| Lindbergh Bay | Vessup Bay | Coki Point |
| Brewers Bay | Hull Bay | Secret Harbor |
| Bolongo Bay | Lindqvist Beach | |
| Magens Bay | Bluebeard’s Beach | |
| Sapphire Beach | Frenchman’s Bay | |

| St. John |
|-------------------|
| Cruz Bay |
| Great Cruz Bay |
| Frank Bay |
| Oppenheimer Beach |
| Johnson Bay |

Please note: Due to supply issues at the lab, the following beach was unable to be analyzed:

- *Honeymoon Beach on Water Island*

Please note: Samples were not collected on ST. CROIX, as well as on the following beach:

- *Water Bay on St. Thomas*

Therefore, the water quality at these beaches is unknown.

All persons should be aware that storm water runoff may also contain contaminants or pollutants harmful to human health and therefore, should avoid areas of storm water runoff (i.e., guts, puddles, and drainage basins) or any area that appears discolored or has foul odors. DPNR will continue to monitor impacted areas and waters.

For additional information regarding water quality call the Division of Environmental Protection at 773-1082 in St. Croix or 774-3320 in St. Thomas.
