FOR IMMEDIATE RELEASE

BEACH ADVISORY

The Department of Planning and Natural Resources (DPNR) announces that the Beach Water Quality Monitoring Program, which evaluates weekly water quality at popular swimming beaches throughout the Territory by sampling for Enterococci Bacteria and Turbidity, a measure of water clarity, advises the public of the following:

DPNR performed water quality analysis at 11 designated beaches on St. Thomas during the week of May 11, 2026– May 15, 2026.

Based on the analytical results, the following beaches met water quality standards and are considered safe for swimming and fishing:

St. Thomas	
Secret Harbor	Lindbergh Bay
Bolongo Bay	Lindqvist Beach
Brewers Bay	Magens Bay
Coki Point	Vessup Bay
Sapphire Beach	Frenchman’s Bay
Hull Bay	

Please note: Samples were not collected at the following beaches:

- *Water Bay on St. Thomas*
- *Bluebeards Beach on St. Thomas*
- *All beaches on St. John*
- *All beaches on St. Croix*
- *Honeymoon Beach on Water Island.*

Therefore, the water quality at these beaches is unknown.

Please be advised that anyone swimming in waters contaminated with sewage, stormwater, or with large amounts of sargassum may be at an elevated health risk due to elevated concentrations of bacteria or other contaminants. Waters impacted by sewage, stormwater runoff (i.e., guts, puddles, and drainage basins), large amounts of sargassum, or any area that appears discolored or has foul odors should be avoided. DPNR will continue to monitor the impacted waters.

For additional information regarding water quality, call the Division of Environmental Protection at 773-1082 in St. Croix or 774-3320 in St. Thomas.
